Sprint 5: Internal Client Meeting Notes

Town Seal Drafts:

- Add space between “NORTHBRENTWOOD” in the 4 drafts
- First two, less print lines (less detailed as the print quality will be like on a penny) don't try to be as direct with the town symbolisms.
- For the last two Town Seal Drafts less urban symbolisms, add more seal types (reference the original design), add some stylism to the font, and more simple (looks too busy)
- Overall, missing the fact that North Brentwood is the second African American established Town, just missing cultural touch. Add if possible though..

Jotform:

- Informed Cris that we have completed the Jotform matching (Scanned PDFs to Jotform fields)
- It notifies the town clerk via email when a resident submit a form
 - Cannot test though since in theory it works, we don't have access to clerk email inbox
- Cris informed us that they chose Square as their payment platform
 - The town's account application is pending, thus they don't have an account

- Informed Cris since that semester is ending and they don't have an account yet, we won't have time to implement payment to Jotform.
- Suggested that this should be the sole goal for next semester's project.
- However if not, I will write documentation on the basics of how to do the payment option themselves.
